

# NSA J02 DATA PROFILE

The Atlanta Regional Commission, in partnership with Neighborhood Nexus, is growing a data-informed decision-making culture across Georgia's social impact sector. Naturally, it all starts with data. This profile presents data on demographics, socioeconomics, commuting, and a host of other topics. To put the data in context, we present information on how NSA J02 has changed over time and also how it compares to Atlanta citywide. This data profile is just one example how we advance our shared mission of democratizing data. For more data resources please visit our website, <https://atlantaregional.org/resources/>, and also [www.neighborhoodnexus.org](http://www.neighborhoodnexus.org). Finally, make sure you check out our blog at <https://33n.atlantaregional.com/> and our interactive mapping site at <http://data.neighborhoodnexus.org/>.

## About Neighborhood Statistical Areas:

Atlanta neighborhoods are “self-identified” by residents. As a result, there are portions of the city that are not part of any neighborhood, while other parts are claimed by more than one neighborhood. Also, some neighborhoods are very small; a few are 1/50 of a square mile or less and have populations of 100 or fewer– much too small to report sample-based statistics. To address these issues, we have defined Neighborhood Statistical Areas (NSAs). These areas: 1) are built from census blocks; 2) nest within NPUs; 3) have a minimum population of 2,000; 4) are comprised of either a single large neighborhood or a set of contiguous smaller neighborhoods and adjacent territory that is not part of a neighborhood; and 5) assign all territory within the city limits to one, and only one statistical area. Because NSAs are formed of census blocks, they are not perfect representations of neighborhood boundaries and may also deviate from the city limits in areas where annexations have taken place since 2020.
